1. Permits, Change, Transfer, Renewal, Sale

A general overview of the three phases of reclamation was discussed with Mr. Ware. Since the Willow Creek site was incrementally bonded the phases of bond release will probably follow the same suit. According to Mr. Ware the application for the first phase of bond release will be prepared and submitted to the Division this year.

2. Signs and Markers

Signs with the required information were posted at access points to the Willow Creek reclaimed site. As of the date of this inspection, access to the Crandall Canyon reclaimed area was not feasible due to the snow depth on the access road.

12. Backfilling And Grading

The small area behind the shop buildings is beginning to dry out. The area was saturated with snow that melted quickly causing some of the depressions to fill in prematurely. The relatively small area approximately 0.1 acres is fairly steep which will require hand crews to re-establish the depressions. Additional seeding is also scheduled.
